Subject: Fwd: Meeting

Mr. Peacock wants a fight? Jim, please advise Bethany of this issue.

Thanks

Lou

Subject: Meeting

Lou, I got your message concerning your availability for meeting times. I would propose that we meet on Monday April 21 around 3:30 if your and Jim Sickles schedules would permit. An alternative would be to meet late in the afternoon on Wednesday April 23 prior to the CAG meeting. Please advise when you get a chance.

Mr. Peacock appears to be unwilling to extend the access agreement that we need in place to monitor the 4 monitoring wells on his property. I will be attempting to meet with him on Tuesday April 22 in an effort to seek his cooperation. If I am unsuccessful, we will advise ADEQ and USEPA in writing of the attempts to seek continued access and then request your assistance in this matter. We asked Mr. Peacock for a 5 year extension to the agreement at the exact same compensation per year he previously accepted. At this time, I am not aware of what his issue is. As you are aware, continued access to the 4 wells on his property is important in monitoring the progress of the clean-up of the northern Subunit C plume. We are expecting to install the new well (E-102) beginning the week of April 28.
